Gyrostat Risk Managed Equity Fund

Meeting client needs: lower risk retirement investors - don't ignore sequencing risk

Portfolio structure from 'accumulation' to 'retirement' adjust Australian equities to:

Lower volatility – 3Yr 8.22% pa* ; 13 years no quarterly losses > 3%

Sequencing risk – designed to increase in value on major market falls (track record since 2010)

Consistent non correlated returns in all market conditions – 3Y + 11.44% pa*

* Class A to 30 September 2024

From existing portfolio replace a beta 1 Australian equities allocation with Gyrostat class A to meet lower risk retirement client needs

Gyrostat Risk Managed Equity Fund

How does Gyrostat compare - 3 years – lower volatility and consistent returns

Static Scatter Chart

12 October 2024

B	Gyrostat - Absolute Return Income Equity Class A TR in AU	11.47	8.21
C	S&P ASX 200 TR in AU	8.44	13.65
D	AMI Equity - Australia Equity Income TR in AU	6.66	11.05

Gyrostat Risk Managed Equity Fund

Portfolio construction – applying our strategy

What are the capital losses drawdown exposures embedded in your portfolio?

Gyrostat Class A performance compared with worst 5 quarters from the ASX accumulation index (since Fund inception December 2010).

Period	ASX accumulation return	Gyrostat Class A return
Apr - Jun 2022	-11.90%	8.70%
Jan - Mar 2020	-23.10%	9.22%
Oct - Dec 2018	-8.24%	4.18%
Jul - Sep 2015	-6.58%	-0.26%
Jul - Sep 2011	-8.17%	1.29%

Stock specific protection reliably increases in value on share price falls.

Gyrostat Risk Managed Equity Fund

Our history

Our DNA was formed by the lessons of the:

- 1990s economic *boom*
- 1997 Asian Financial *Crisis*
- the 1990's internet *boom*
- 2000 Tech *crash*
- the early 2000s *boom*
- 2007 Global Financial *Crisis*
- the challenges posed by the 2020 Covid market *falls*

The idea that “in the long run” markets will recover offers little comfort for many investors, particularly pre- and post-retirees.

Gyrostat Risk Managed Equity Fund

Diversification requires non correlated assets to be effective

Gyrostat Risk Managed Equity Fund: Classes A & B have:

Downside protection always in place

Regular income, designed to increase in value on major market falls

Returns are non-correlated with the market providing portfolio diversification benefits such as lower risk, higher risk-adjusted returns, and reduced exposure to market shocks

Class A has downside protection always in place, regular income, with returns in rising and falling markets including a market crash.

Class B is a leveraged version with a greater focus on returns.

Gyrostat Risk Managed Equity Fund

Diversification requires non correlated assets to be effective

2 Year to 30th September 2024

Class A: -1.26%*
Class B: -0.79%

*13 year track record
no quarterly downside losses > 3%

Gyrostat Risk Managed Equity Fund

How does Gyrostat construct its Portfolio?

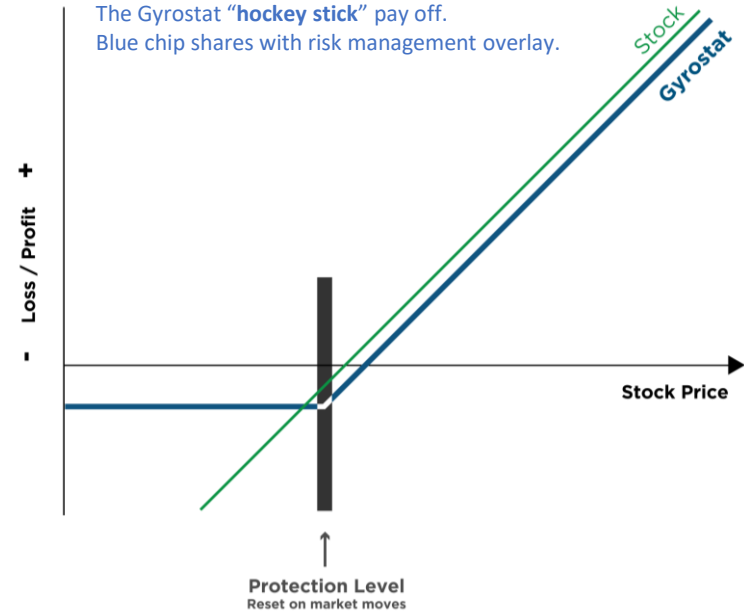

There are 3 steps in our risk management investment approach:

- a. **Buy** stock [approx. 95% capital deployed in stock]
- b. **Set** risk management overlay [approx; 5% capital]
- c. **Re-set** dynamic risk managed overlay with market moves

ASX 20 stocks and index with protection at stock specific level

Two dimensional pay-off with capital at risk within pre-defined risk tolerance

Protection reliably increases in value on stock price falls

Gyrostat Risk Managed Equity Fund

Portfolio structure to address uncertainty – not predictions

Investors who include non-correlated assets generate smoother returns in a broad range of market scenarios (not just rising markets)

This is why we structure our portfolio with protection always in place for each stock holding – protection which reliably increases in value on market falls.

Our biggest investment regrets are often our inactions, not our actions, particularly where the consequences of failing to act threaten your lifestyle.

Gyrostat Risk Managed Equity Fund

Our edge – taking advantage of the inherent fluctuations in stock prices

Times are uncertain.

- We're seeing high stock market valuations in a bull market.
- High debt levels provide liquidity to drive momentum but elevate default risks.
- The price of protection remains near historic lows despite rising geopolitical tensions.
- Uncertainty over the timing of interest rate cuts given inflation still not controlled.

Gyrostat Risk Managed Equity Fund

Our edge – taking advantage of the inherent fluctuations in stock prices

With our approach we do not need to debate conflicting market views, it is the differing market predictions and general uncertainty that generates our returns

Our investment strategy takes advantage of the inherent fluctuations in stock prices

Gyrostat Risk Managed Equity Fund

Portfolio construction – applying our strategy

Many investors misunderstand what is required to structure an effective diversified portfolio.

Diversification needs non-correlated assets to be effective.

Asset spread/multiple managers not enough.

Gyrostat Risk Managed Equity Fund

Portfolio construction – applying our strategy

What is your ‘risk’ appetite?

Lower volatility: Loss aversion increases with age and retirement.

Gyrostat track record –

- consistent with guidance and objectives.
- non correlated with market designed to reliably increase in value on market falls.

Providing diversification benefits as a robust building block in your portfolio.

Gyrostat Risk Managed Equity Fund

Portfolio construction – applying our strategy

What are the capital losses drawdown exposures embedded in your portfolio?

Gyrostat Class A performance compared with worst 5 quarters from the ASX accumulation index (since Fund inception December 2010).

Period	ASX accumulation return	Gyrostat Class A return
Apr - Jun 2022	-11.90%	8.70%
Jan - Mar 2020	-23.10%	9.22%
Oct - Dec 2018	-8.24%	4.18%
Jul - Sep 2015	-6.58%	-0.26%
Jul - Sep 2011	-8.17%	1.29%

Stock specific protection reliably increases in value on share price falls.

Gyrostat Risk Managed Equity Fund
